Dear Parents,

Greetings!

We encourage you to enter your child in the Yardstick's STEAMazing Challenge. Science is all around us, and this program provides an educational and fun way for kids to learn about their world and maybe even discover their "inner scientist." It's an adventure to explore and understand the science of everyday life.

The STEAMazing Challenge is the premier national science competition for students in grades 5 through 10. Yardstick shares a goal to inspire students to explore the wonders of science and achieve new levels of academic success.

Your child could receive recognition as a state merit winner or even become one of 50 finalists participating in the Final Challenge. The winners will take home the lot of prizes including the cash prize and the title, India's Top Young Scientist!

To enter your child in the Challenge, simply visit the website www.yardstickedu.com/steamazing and follow the steps to complete the online Parental Consent Form. Then have your child create a short video describing a new innovation or solution related to a real-world problem and enter by November 5th, 2018. For thought starters, judging criteria and complete rules, visit <https://bit.ly/2Dgvgl8>.

The Yardstick's STEAMazing Challenge promises to be an incredible journey for young participants. We hope you consider entering your child in the 2018 competition!
